<p>10. Course overview:</p> <p>This book is intended for learners at the upper A2 level and B1 level on the Council of Europe scale, and teaches more than 2,000 words and phrases. The vocabulary is organised around common everyday topics, but also contains units on different aspects of language such as phrasal verbs, uncountable nouns and link words and phrases. These units provide key information about lexis, but also help to ensure that learners are exposed to the most important vocabulary for their level. The first four units are dedicated to aspects of vocabulary learning such as record keeping and dictionary use. The book has been written so that units can be studied in any order. Throughout the book, vocabulary items have been chosen for their usefulness in a wide range of everyday situations. The words and phrases have mainly been selected using the Cambridge Learner Corpus, examination wordlists and classroom materials, and in this book the main focus is on words and phrases at the upper end of the A2 level and across the B1 level. Much of the new vocabulary (on average about 25 items per unit) is presented through different types of text, and then explained immediately after the item appears, or in a separate glossary below the text. The new vocabulary is then practised on the right-hand pages through a wide range of exercise types. These pages generally progress from easier to more difficult exercises.</p>
