Course Objectives:

This course aims to build/develop students' academic abilities and skills. Thus, when the course is over, the Student suppose to have some basic academic skills as below:

- To be able to listen, to build an argument and to speak in an appropriate academic way during a debate
- To learn “critical thinking” which might help her/him in problem-solving
- Improve her/his verbal communication and written skills
- To learn how to read, and then write a summary of what he/she has read
- To improve his/her presentation's skills (including time management)
- To be able to write academic reports
- To be a real modern and academic figure
