What is Accounting?

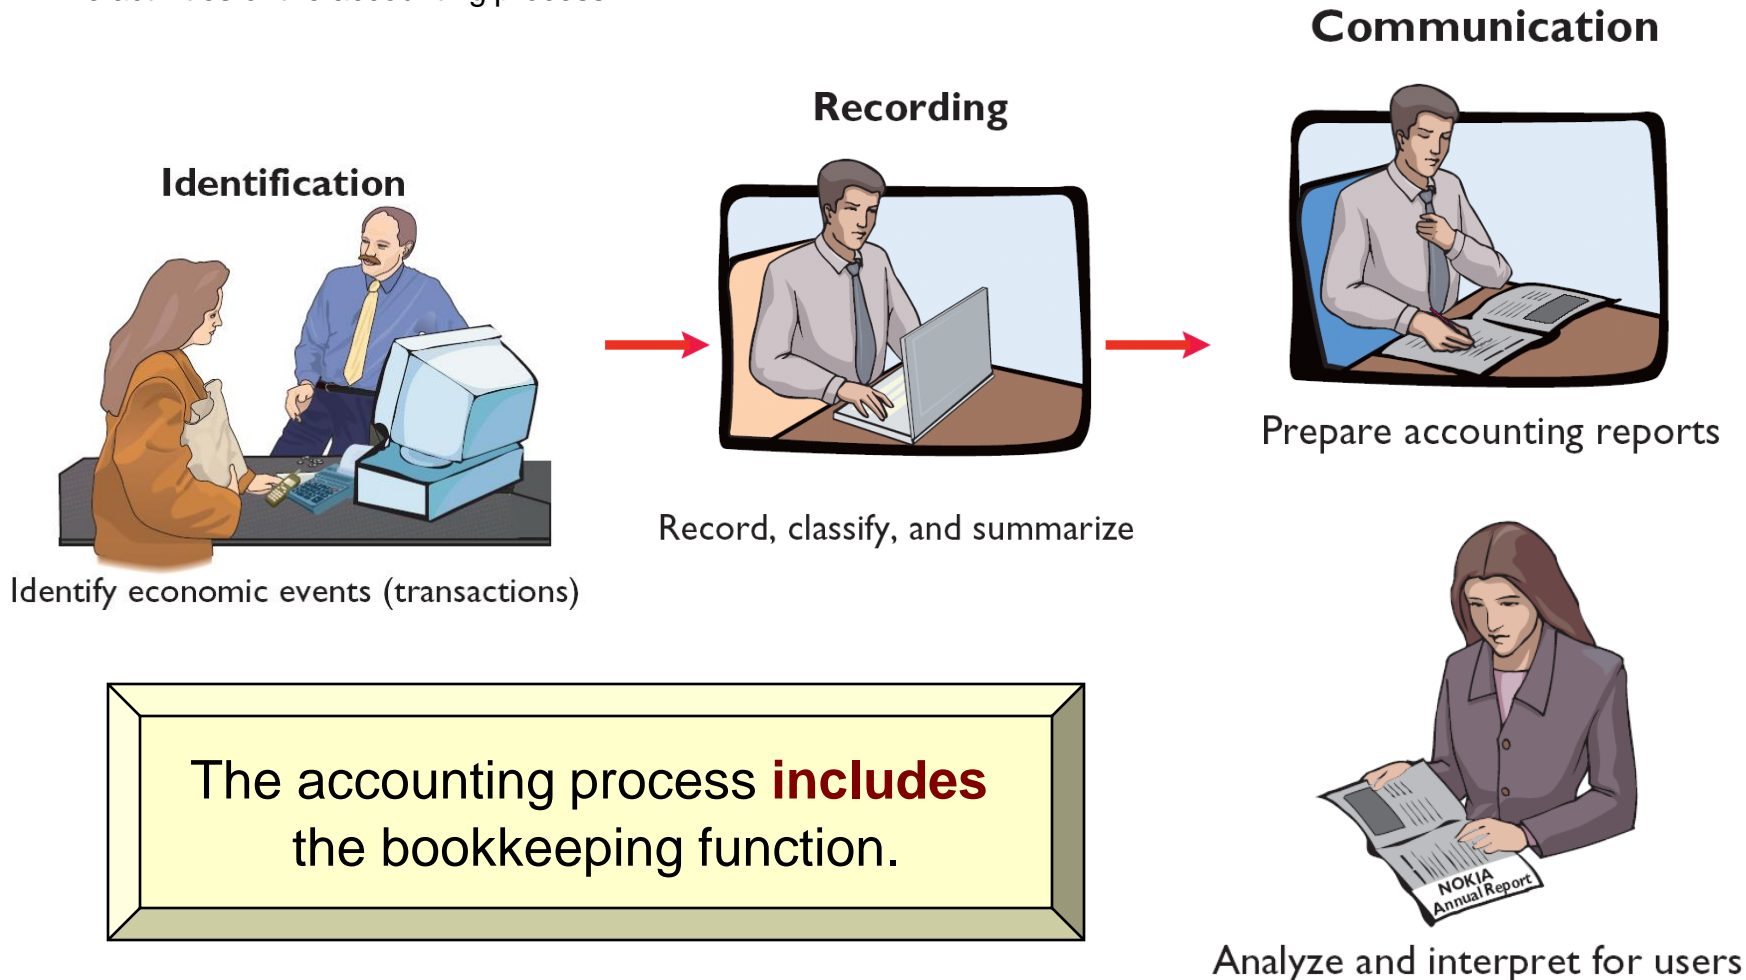

Accounting is “an information system that:

- (1) identifies, records, and communicates** the economic events of an
- (2) organization to**
- (3) interested users.**

Indicate whether the following statements are **true** or **false**.

1. The three steps in the accounting process are identification, recording, and communication.
2. Bookkeeping encompasses all steps in the accounting process.
3. Accountants prepare, but do not interpret, financial reports.
4. The two most common types of external users are investors and company officers.
5. Managerial accounting activities focus on reports for internal users.

Generally Accepted Accounting Principles

Various users
need financial
information

Financial Statements

- ◆ Balance Sheet
- ◆ Income Statement
- ◆ Statement of Owner's Equity
- ◆ Statement of Cash Flows
- ◆ Note Disclosure

The accounting profession
has developed standards
that are generally accepted
and universally practiced.

**Generally Accepted
Accounting Principles
(GAAP)**

Generally Accepted Accounting Principles

Generally Accepted Accounting Principles (GAAP) - Standards that are generally accepted and universally practiced. These standards indicate how to report economic events.

Standard-setting bodies:

- ▶ **Financial Accounting Standards Board (FASB)**
- ▶ **Securities and Exchange Commission (SEC)**
- ▶ **International Accounting Standards Board (IASB)**

International Note

Over 100 countries use International Financial Reporting Standards (called IFRS). For example, all companies in the European Union follow international standards. The differences between U.S. and international standards are not generally significant.

Measurement Principles

HISTORICAL COST PRINCIPLE (or cost principle) dictates that companies record assets at their cost.

FAIR VALUE PRINCIPLE states that assets and liabilities should be reported at fair value (the price received to sell an asset or settle a liability).

Selection of which principle to follow generally relates to trade-offs between **relevance** and **faithful representation**.

Helpful Hint

Relevance and faithful representation are two primary qualities that make accounting information useful for decision-making.

Assumptions

MONETARY UNIT ASSUMPTION requires that companies include in the accounting records only transaction data that can be expressed in terms of money.

ECONOMIC ENTITY ASSUMPTION requires that activities of the entity be kept separate and distinct from the activities of its owner and all other economic entities.

- ◆ Proprietorship
- ◆ Partnership
- ◆ Corporation

Forms of Business
Ownership

Forms of Business Ownership

Proprietorship

- ◆ Owned by one person
- ◆ Owner is often manager/operator
- ◆ Owner receives any profits, suffers any losses, and is personally liable for all debts

Partnership

- ◆ Owned by two or more persons
- ◆ Often retail and service-type businesses
- ◆ Generally unlimited personal liability
- ◆ Partnership agreement

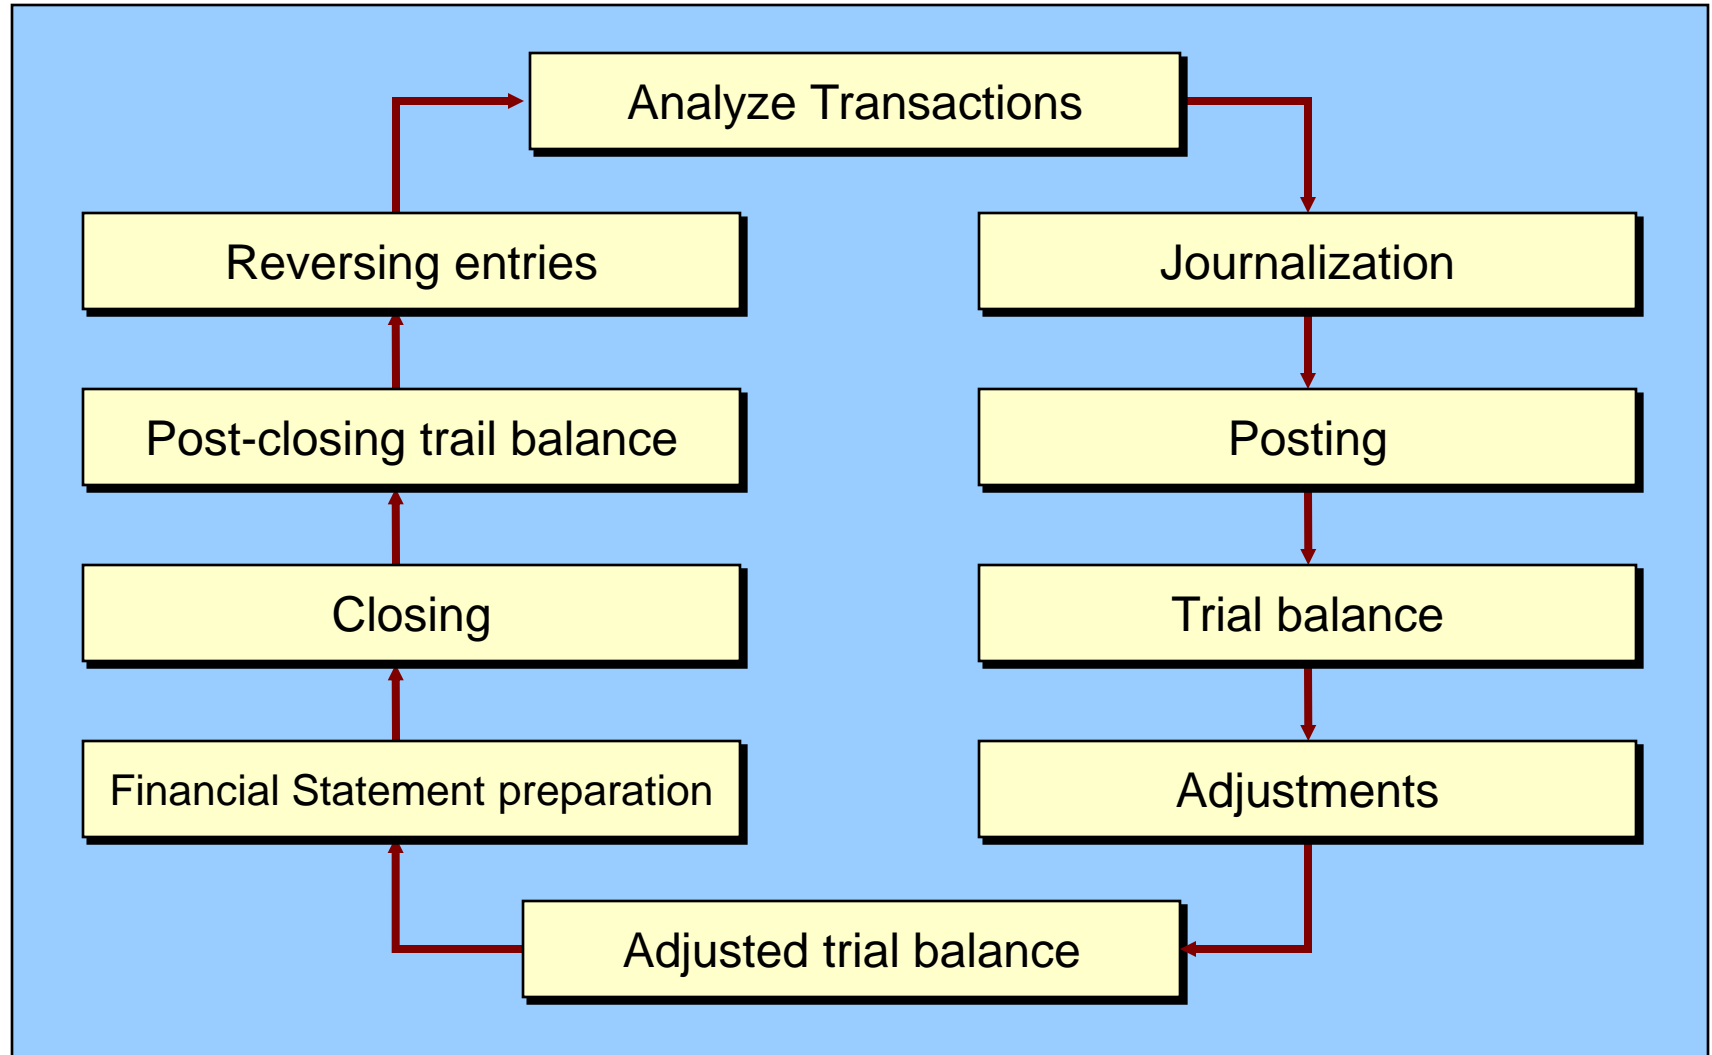

Corporation

- ◆ Ownership divided into shares of stock
- ◆ Separate legal entity organized under state corporation law
- ◆ Limited liability

Indicate whether each of the following statements presented below is true or false.

1. The cost principle dictates that companies record assets at their cost. In later periods, however, the fair value of the asset must be used if fair value is higher than its cost.
2. A business organized as a separate legal entity under state law having ownership divided into shares is a corporation.
3. Relevance means that financial information matches what really happened: the information is factual.
4. A business owner's personal expenses must be separated from expenses of the business to comply with accounting's economic entity assumptions.

The Accounting Cycle

The Basic Accounting Equation

$$\boxed{\text{Assets}} = \boxed{\text{Liabilities}} + \boxed{\text{Owner's Equity}}$$

- Provides the **underlying framework** for recording and summarizing economic events.
- Applies to all economic entities regardless of size.

Basic Accounting Equation

$$\boxed{\text{Assets}} = \boxed{\text{Liabilities}} + \boxed{\text{Owner's Equity}}$$

Assets

- ◆ Resources a business owns.
- ◆ Provide future services or benefits.
- ◆ Cash, Supplies, Equipment, etc.

Basic Accounting Equation

$$\boxed{\text{Assets}} = \boxed{\text{Liabilities}} + \boxed{\text{Owner's Equity}}$$

Liabilities

- ◆ Claims against assets (debts and obligations).
- ◆ Creditors (party to whom money is owed).
- ◆ Accounts Payable, Notes Payable, Salaries and Wages Payable, etc.

Basic Accounting Equation

$$\boxed{\text{Assets}} = \boxed{\text{Liabilities}} + \boxed{\text{Owner's Equity}}$$

Owner's Equity

- ◆ Ownership claim on total assets.
- ◆ Referred to as residual equity.
- ◆ Investment by owners and revenues (+)
- ◆ Drawings and expenses (-).

Owner's Equity

Illustration 1-6
Expanded accounting
equation

Basic Equation	Assets = Liabilities	+	Owner's Equity			
Expanded Equation	Assets = Liabilities	+	Owner's Capital	-	Owner's Drawings	+ Revenues - Expenses

Increases in Owner's Equity

- ◆ **Investments by owner** are the assets the owner puts into the business.
- ◆ **Revenues** result from business activities entered into for the purpose of earning income.
 - ▶ **Common sources of revenue** are: sales, fees, services, commissions, interest, dividends, royalties, and rent.

Owner's Equity

Illustration 1-6
Expanded accounting
equation

Basic Equation	Assets = Liabilities	+	Owner's Equity			
Expanded Equation	Assets = Liabilities	+	Owner's Capital	-	Owner's Drawings	+ Revenues - Expenses

Decreases in Owner's Equity

- ◆ **Drawings** An owner may withdraw cash or other assets for personal use.
- ◆ **Expenses** are the cost of assets consumed or services used in the process of earning revenue.
 - ▶ **Common expenses** are: salaries expense, rent expense, utilities expense, tax expense, etc.

Classify the following items as investment by owner, owner's drawings, revenue, or expenses. Then indicate whether each item increases or decreases owner's equity.

Analyze the effects of business transactions on the accounting equation

Transactions are a business's economic events *recorded* by accountants.

- May be external or internal.
- Not all activities represent transactions.
- Each transaction has a **dual effect** on the accounting equation.

Transaction Analysis

Chapter Two

The Recording Process

Learning Objectives

1. Describe how accounts, debits, and credits are used to record business transactions.
2. Indicate how a journal is used in the recording process.
3. Explain how a ledger and posting help in the recording process.
4. Prepare a trial balance.

The Account

- ◆ Record of increases and decreases in a specific asset, liability, owners' equity, revenue, or expense item.
- ◆ Debit = "Left"
- ◆ Credit = "Right"

An account can be illustrated in a T-account form.

Account Name	
Debit / Dr.	Credit / Cr.

The Account

DEBIT AND CREDIT PROCEDURES

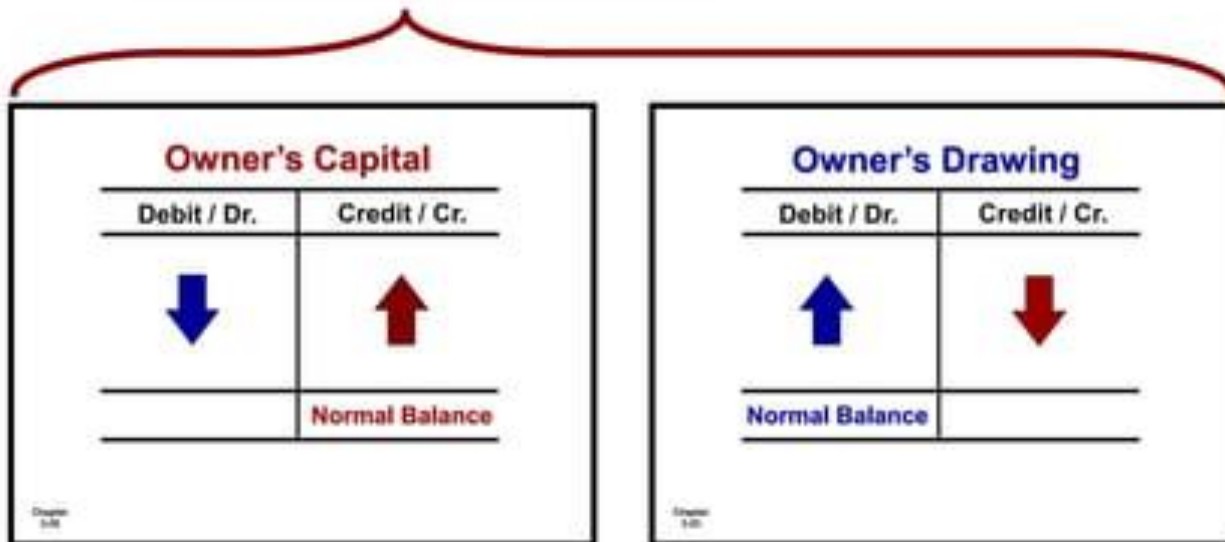

Double-entry system

- ◆ Each transaction must affect two or more accounts to keep the basic accounting equation in balance.
- ◆ Recording done by debiting at least one account and crediting at least one other account.
- ◆ **DEBITS must equal CREDITS.**

Debits and Credits

Owner's Equity	
Debit / Dr.	Credit / Cr.
	
	Normal Balance

- ◆ Owner's investments and revenues increase owner's equity (credit).
- ◆ Owner's drawings and expenses decrease owner's equity (debit).

Helpful Hint Because revenues increase owner's equity, a revenue account has the same debit/credit rules as the Owner's Capital account. Expenses have the opposite effect.

Debits and Credits

Revenue

	Normal Balance

Expense	
Debit / Dr.	Credit / Cr.
	
Normal Balance	

- ◆ The purpose of earning **revenues** is to benefit the owner(s).
- ◆ The effect of debits and credits on revenue accounts is the **same** as their effect on Owner's Capital.
- ◆ **Expenses** have the opposite effect: expenses decrease owner's equity.

Kate Browne has just rented space in a shopping mall. In this space, she will open a hair salon to be called "Hair It Is." A friend has advised Kate to set up a double-entry set of accounting records in which to record all of her business transactions. Identify the balance sheet accounts that Kate will likely need to record the transactions needed to open her business. Indicate whether the normal balance of each account is a debit or a credit.

Assets	Liabilities	Equity
Cash (debit)	Notes payable (credit)	Owner's Capital (credit)
Supplies (debit)	Accounts payable (credit)

Steps in the Recording Process

Illustration 2-12

Business documents, such as a sales slip, a check, or a bill, provide evidence of the transaction.

2-15

LO 2

- Practically every business uses three basic steps in the recording process:
1. Analyze each transaction for its effects on the accounts.
 2. Enter the transaction information in a journal.
 3. Transfer the journal information to the appropriate accounts in the ledger

Steps in the Recording Process

The Journal

- ◆ Book of original entry.
- ◆ Transactions recorded in chronological order.
- ◆ Contributions to the recording process:
 1. Discloses the **complete effects of a transaction**.
 2. Provides a **chronological record** of transactions.
 3. Helps to **prevent or locate errors** because the debit and credit amounts can be easily compared.

Steps in the Recording Process

JOURNALIZING - Entering transaction data in the journal.

Illustration: On September 1, Ray Neal invested \$15,000 cash in the business, and Softbyte purchased computer equipment for \$7,000 cash.

Illustration 2-13

	Cash			7,000

Steps in the Recording Process

SIMPLE AND COMPOUND ENTRIES

Simple Entry - Two accounts, one debit and one credit.

Compound Entry - Three or more accounts.

Illustration: On July 1, Butler Company purchases a delivery truck costing \$14,000. It pays \$8,000 cash now and agrees to pay the remaining \$6,000 on account.
